Yealink

MeetingEye Easy Mode
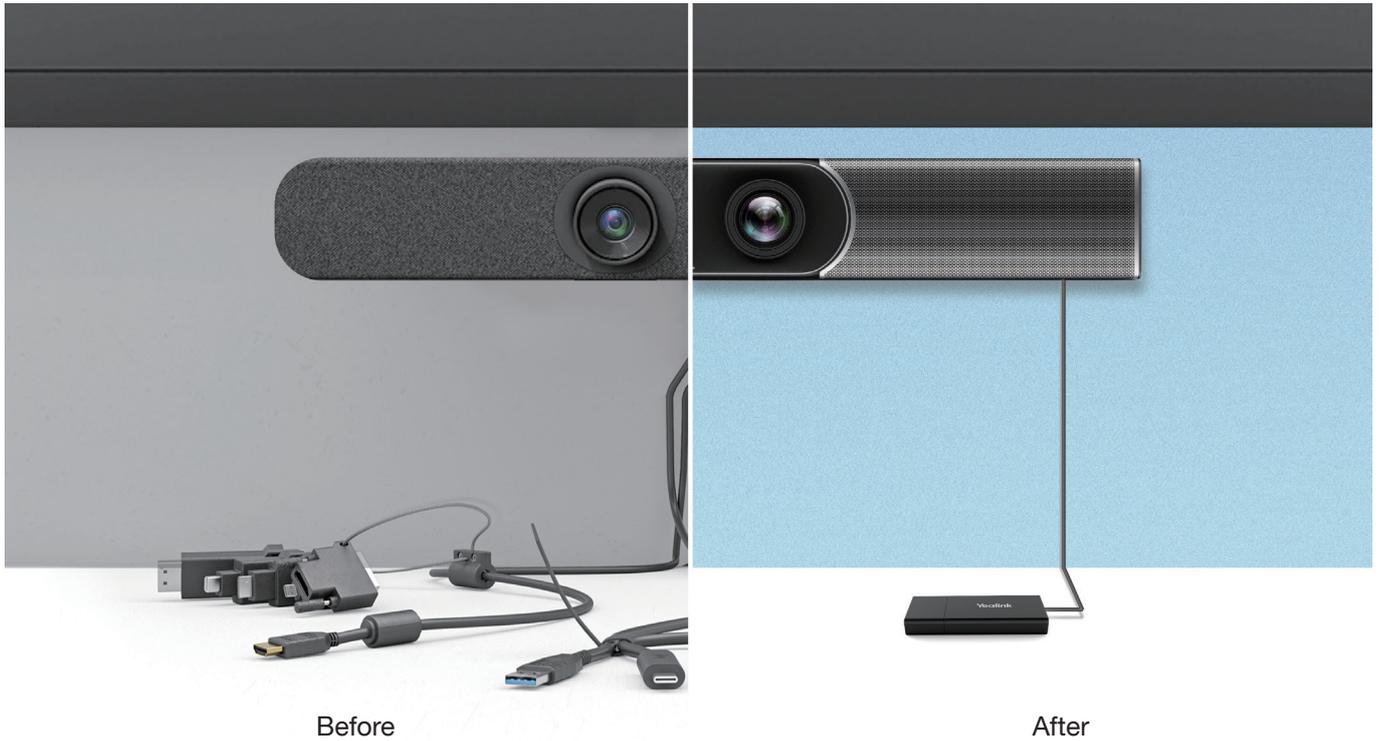

Used as an USB VC endpoint

ONE CABLE TO CONNECT ALL

Together with VCH51, Yealink MeetingEye Easy Mode is a BYOD mode allowing MeetingEye 400/600 to be used as a USB VC endpoint. Connecting any platform or meeting just by one cable to the computer, MeetingEye Easy Mode delivers a native, smooth and premium video experience anytime and anywhere.
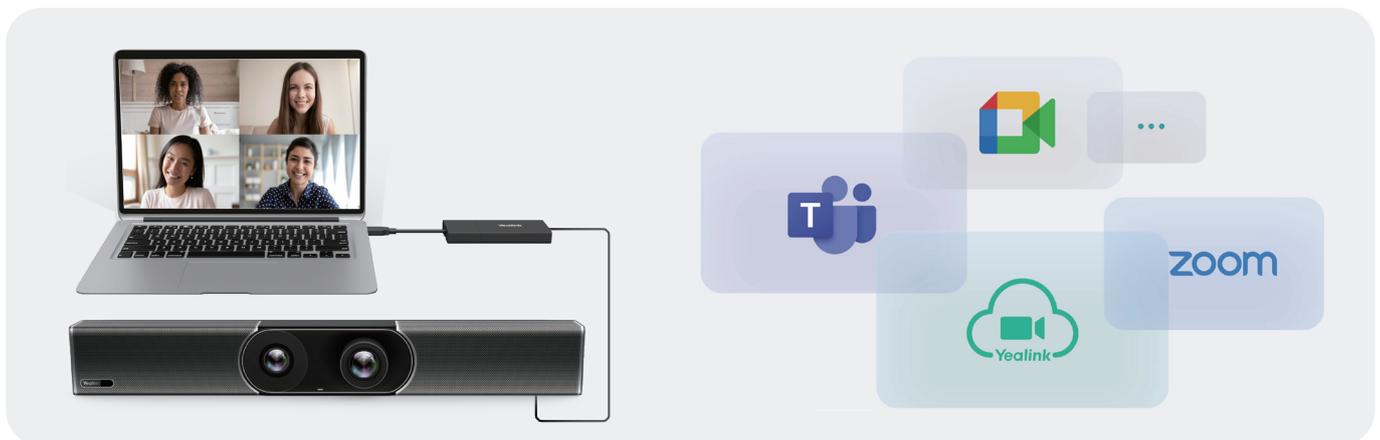

Nearly Invisible

Instead of stacking disorder in traditional deployment, a single Ethernet cable is the only thing needed for 10s quick start. It's almost invisible and brings back a tidy meeting space ever before.

Before

After

1s Connection

Native compatibility with mainstream VC platforms under MeetingEye Easy Mode delivers a fast and frictionless connection to any meeting, bridging a seamless experience between different platforms easily.

One Cable for All

Signal connection and content sharing can be both done at one time just by one Ethernet cable with VCH51, which ensures efficient and convenient meeting experience.

4K Brilliance Anytime

With USB Easy Mode, you can enjoy the 4K clarity, AI intelligence and premium audio of MeetingEye anytime in any your own devices.

4K UHD Clarity

AI Framing

Voice Tracking

8 MEMS Mics
