

## Yealink Demo Program for Metaswitch ITSP

Valid from June 1 to August 31, 2015

This Program is launched for **Metaswitch service providers (SP)** who would like to try new phones and offer additional robust options to their end users.

Yealink earned **Metaswitch certification (CFS V9.0)** and introduced its new software package, the **End Point Pack V4**, with multiple upgrades including more flexible configurations and a better UI design. Highlighted features include Intercom and Push-to-Talk.

Yealink's entire range of SIP Phones support **Metaswitch's CommPortal™ Phone Applications**, allowing users to access advanced functions directly from their phone terminals instead of opening a web browser or turning on their computer. Functions include Automated Call Distribution (ACD) and One-Button Log-in/Log-out, Message List, Network Contacts and more.

### Yealink Introduction

Yealink, the global leading unified communication (UC) terminal solution provider, helps businesses of all sizes make the most of their UC experience and embrace the power of "Easy Collaboration".

The company's comprehensive product portfolio includes video conferencing systems, conference phones, desk IP phones, wireless DECT phones and accessories.

Yealink is currently **the world's number two SIP phone provider** in terms of SIP phone shipments, according to Frost & Sullivan's statistics in 2014.
