VC800 is the second generation full-HD video conferencing system launched by Yealink. Equipped with the strongest embedded MCU within the industry, VC800 can support 24-site HD video conferencing plus two virtual meeting rooms. It has an all-in-one design and first-class video and audio technology that creates an easier and more effective collaboration experience. As the newest generation of Yealink VC series video conferencing systems, the VC800 adopts an intuitive user interface that makes meeting control simpler. Featuring H.265/HEVC, Opus and HD voice backed by Harman Kardon speaker, the Yealink VC800 facilitates more immersive audio-visual collaboration. By leveraging Yealink Meeting Server(YMS), the VC800 seamlessly supports Meeting Scheduling and One-touch Meeting Access. All combine to make VC800 one of the perfect solutions for the medium-to-large meeting rooms.

Key Features and Benefits

Powerful Built-in MCU
Yealink VC800 supports up to 24 sites HD video conferencing and two virtual meeting rooms. Meanwhile, it backs up Automatic Voice Activated Switching and local meeting control, making the meeting be in an orderly manner.

Immersive Audio-Visual Experience
Using a new 12x optical PTZ camera, it supports 1080P/60FPS video calls, thus greatly enhancing the fluency of video conferencing and making the presentation more vivid even in details. Co-worked with Yealink conference phone CP960, Yealink VC800 creates a better audio solution. Backed by Harman Kardon speaker, Opus codec, two DECT-based wireless expansion microphones and quality 20ft/360° voice pickup distance, VC800 ensures that anyone in the workspace could have an immersive HD audio experience.

Easier Meeting Experience and Simpler Deployment
Yealink VC800 owns all-in-one design which combines codec and camera together, only one standard RJ45 network cable could connect TV area and conference table. Moreover, its 5-inch touchable VCS phone makes the membership and meeting control simpler and more intuitive, and its friendly TV-style user interface helps you minimize the learning cost.

Less Bandwidth, Better Network Adaptability
Via supporting H.265/HEVC video codecs, just with the minimum 512kbps, 1080P HD video calls can be realized, thus saving more than 50% bandwidth than using H.264. Thanks to Yealink anti-packet loss technology, VC800 can resist up to 30% video and audio packet loss which guarantees smooth video communication.

Compatibility and Integration
Yealink VC800 supports standard H.323/SIP dual protocol. It is not only deeply integrated with Yealink Meeting Server(YMS), supporting Meeting Scheduling and One-touch Meeting Access; but also worked with Yealink Cloud Management Service, bringing quick deployment. Besides, it supports the 3rd-party room system and integrates with the leading cloud platforms.
