

About Futurewei Technologies, Inc.

Futurewei Technologies was founded in 2001, which maintains ongoing, in-depth collaboration with a broad range of research institutes and forward-thinking companies around the world in multiple domains, engages in research and development of information and communication technologies (ICT)

Challenge

- Futurewei that has 8 offices across the USA, would like to transform its telecommunication technology from multiple onsite legacy systems to Zoom. The IT team was looking for a new phone system that is cost-effective and able to integrate with Zoom.

Requirements

- Beyond phone communication, Futurewei would like conference phones that can manage the digital whiteboards, which provide both video conferences and touchscreen drawings.
- The project also started when the COVID19 pandemic began in the USA. Therefore, zero-touch provisioning and flexible system customization also became critical.

Solutions

- Fifty CP960 conference phones which used Android operating systems, had high-quality microphones, HD voice quality, touch screen navigation, and features to fully integrated with Zoom to remotely manage video conferences and drawings on the digital whiteboards.
- Five hundred T23G desk phones that supported zero-provisioning and were capable to let the employees use at home during the COVID19 pandemic.

Why Yealink:

- Fully integrated with Zoom
- Cost-effective
- Easy deployment
- User-friendly

CP960

T23G

Testimonial

"Futurewei selected Yealink phones for the excellent sound quality, lighter weight, modern design, and ease of use. Yealink's products that could seamlessly integrate with multiple SaaS solutions accelerated our progress to achieve our vision of versatile and user-friendly telecollaboration."

-- Cooper Chien, IT Director, Futurewei
