

Experience Yealink T5 Business Phone Series

Upgraded Chipset

Yealink T5 Series Phones is built in with a powerful and effective brand-new quad-core processor, which capacity is four times higher than the mainstream phone in the IP phone industry.

With the high-capacity chipset, the frequency of updating is reduced and the service cycle is extended. It is cost-effective as more functions can be supported continuously.

Corded-Cordless Phone

Based on DECT technology, the Yealink T5 series will support an additional 4 DECT handsets via plugging in a DECT dongle DD10K.

To avoid missing any vital calls when leaving personal office, a paired DECT handset would be helpful for users to switch calls automatically from the T5 phone.

· User scenario: Retail Store, Warehouse, Hotel, 4S store, Office

Built-in Bluetooth/Wi-fi

The built-in Bluetooth 4.2 is good for wireless headset and mobile phone connection. And the built-in Wi-Fi 2.4G/5G helps businesses maximize the use of wireless network.

· User Scenario: Wireless office, Old office building, Museum, Church, School

Acoustic Shield Technology

Yealink Acoustic Shield Technology uses multiple microphones to create a virtual “shield”, intelligently picks up your voice but blocks or mutes sounds outside the shield when using the phone’s handset or a connected headset.

· User scenario: Busy and noisy workspace such as call center, office area etc.

Fully adjustable display

The displays of the T5 Series are fully adjustable to fulfill the viewing needs at a variety of angles and under a variety of lighting conditions.

· User scenario: Open workplace

Relationship between T4S & New T5 Series

The price is only 5% upper than T4 series in average.
