May 12, 2019

Greetings,

Cisco is pleased to announce that the Yealink W60B has been formally validated with
BroadWorks. The device model(s) listed below have been validated as interoperable with
the BroadWorks SIP interface. Configuration details and any issues or limitations
identified during the interoperability testing are documented in the BroadWorks Partner
Configuration Guide (PCG) *PartnerConfigGuide Yealink W60B*. The PCG is available to
Cisco BroadWorks customers on the BroadSoft Xchange website at
xchange.broadsoft.com.

Cisco validates that the device interoperates with the BroadWorks SIP interface. Cisco
does not validate qualitative aspects of the device, capacity, or other device capabilities
outside the scope of the SIP signaling interface.

The validation covers the Yealink version(s) and BroadWorks release listed below. Any
versions tested previously are documented in the PCG.

Yealink W60B version 77.83.0.10*
BroadWorks Release 22.0

*This validation also applies to all subsequent compatible maintenance releases to this
device version.

Best Regards,

Feng Wei
Sr. Engineer
