Presenter Tracking

Audio Scalability

Dual-Camera System

The Yealink UVC86 is a 4K dual-eye intelligent camera for medium and large rooms with a perfect display for everyone and every detail.

With a built-in dual 4K camera and a range of AI-driven features, including Auto Framing, Speaker Tracking and Presenter Tracking, the UVC86 empowers your meeting space by reproducing every moment and detail precisely. Covering a wide field of view of 90° with a mechanical pan, the UVC86 tilt up and down easily via remote control or Yealink camera control plug-in software, bringing more efficient collaboration.

Dual 4K Camera, Pro-Grade Video Experience

The Yealink UVC86 is a built-in dual-eye 4K camera with a panoramic camera to detect participants in real-time and a PTZ camera to capture the best picture of everyone in the room. Enjoy an accurate and smooth tracking experience whenever meeting participants are present. With 12X optical zoom and 90° field of view, the UVC86 captures every person in the room as well as ensures high-definition picture quality when zoomed in.

Flexible Options, Personalized Audio Solution

UVC86 brings great flexibility to the audio solutions. Users can choose voice pickup devices including Yealink VCM34 microphone, VCM38 ceiling microphone, and the CPW90 wireless microphone, combining with MSpeaker II sound bar for particular needs.

AI-Powered Video for Automatic Perfection

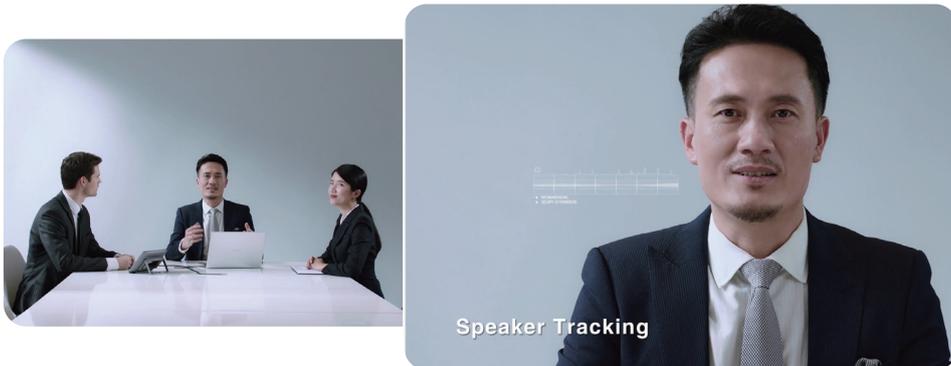

Auto Framing

Auto Framing automatically recognizes the number and the positions of attendees. It frames the first meeting participant and then continually adjusts as more participants enter the space, eliminating manual setups.

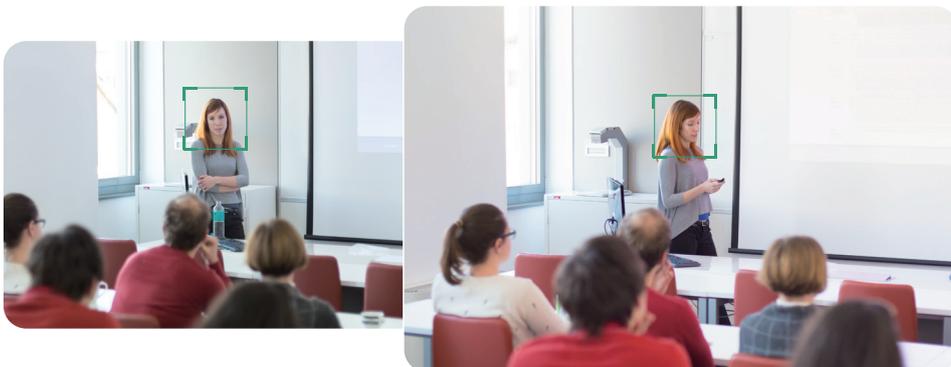

Speaker Tracking

With built-in 6 beamforming microphone arrays for sound localization, Speaker Tracking frames a real-time close-up of the speaker, bringing a vivid face-to-face meeting experience and ensuring attendees are well-engaged.

Presenter Tracking

Presenter Tracking ensures the camera follows the presenters around the room when they are presenting, making them always in the center of the view of the camera. Remote participants could experience as good as they are in the room.
