Key Features and Benefits

**Optima HD Voice**
Yealink Optima HD Voice technology combines cutting-edge hardware and software with wideband technology for maximum acoustic performance. As a speech codec for real-time, packet-based voice communications, SILK, is designed to perform a higher HD audio quality which provides scalability in several dimensions and is highly scalable in terms of audio bandwidth, network bit rate, and complexity. And its hearing aid compatible (HAC) handset helps the person who is with hearing loss to hear the voice more clearly.

**Maximize Productivity**
Yealink’s T41S is fully compatible with Skype for Business online, on-premises and hybrid deployment- effectively extending the benefits of Microsoft® Skype for Business. Pin your favorite contacts directly to the home screen, visually arrange them as you like, and dial them easily with just a tap. The T41S lets users synchronize Outlook Calendar meeting schedules in real-time by simply clicking to join a meeting. Further outfitted with directory synchronization, visual voicemail management, Boss/Admin and more, it raises the bar for productivity to new heights. With an all-new USB port, the T41S boasts unparalleled functionality and expansibility with USB recording and USB headset features.

**Effortless Deployment**
Supporting Microsoft’s Skype for Business Server in-band provisioning and in-band configuration management enables a carefree configuration and easier-than-ever mass deployment. Automatically deploy on a variety of servers- http, https, tftp and ftp, Yealink’s T41S can even be pre-installed with Yealink’s premium software for Skype for Business prior to shipping, meaning plug-and-play for customers immediately after unboxing. Furthermore, a unified firmware and auto-p template that applies to all T4S phone models (T41S, T42S, T46S and T48S), saves even more time and costs for businesses, as well as simplifies the management and maintenance.
