MeetingEye 800

4K Ultra-HD Detachable Video Conferencing Endpoint
for Large Conference Rooms

Three-screen
Display

4K Video
Calling

One-line
Deployment

MeetingEye 800, a new-generation video conferencing endpoint designed for large conference rooms, supports "dual 4K" video calling and content sharing, bringing ultra-HD experience. MeetingEye 800 supports three screens to display different pictures at the same time, presenting rich information. MeetingEye 800 adopts a detachable design and is equipped with Yealink's professional audio and video equipment. It is easy to deploy and supports touch panel and remote control provided by Yealink. This convenient and efficient product is an ideal choice for large conference rooms.

4K Dual Stream, Bringing Ultra-HD Audio And Video Experience

MeetingEye 800 supports up to 4Kp30 portraits and 4Kp15 content pictures during video conferencing, which can avoid 30% video packet loss and prevent blurry display. The combination of multiple cascaded array microphones and conference speakers provides a professional audio-video conferencing experience.

Three-screen Display to Enable Free Display of Pictures

MeetingEye 800 provides three HDMI outputs, all of which support 4K display. Three screens can present different pictures at the same time, displaying rich content. Pictures can be freely enlarged on each screen without missing any key information.

Detachable Design, Easy to Install And Deploy

MeetingEye 800 adopts a detachable design, which supports installation and deployment such as hanging on the wall, placing on the table, hanging under the table and placing on the cabinet. Through VCH interface, the product integrates data transmission, signal control, and power supply with only one multi-function line. The accessories and the host can be connected with only one network cable, simplifying the cable layout of conference rooms and reducing deployment costs.

Hanging on the table

Placing on the cabinet

*Accessories: including camera, touch panel, speaker, ceiling-mounted microphone, etc.
