

Deliver A Simple and Quality Room Experience in the Modern Workpace

Trusted Performance

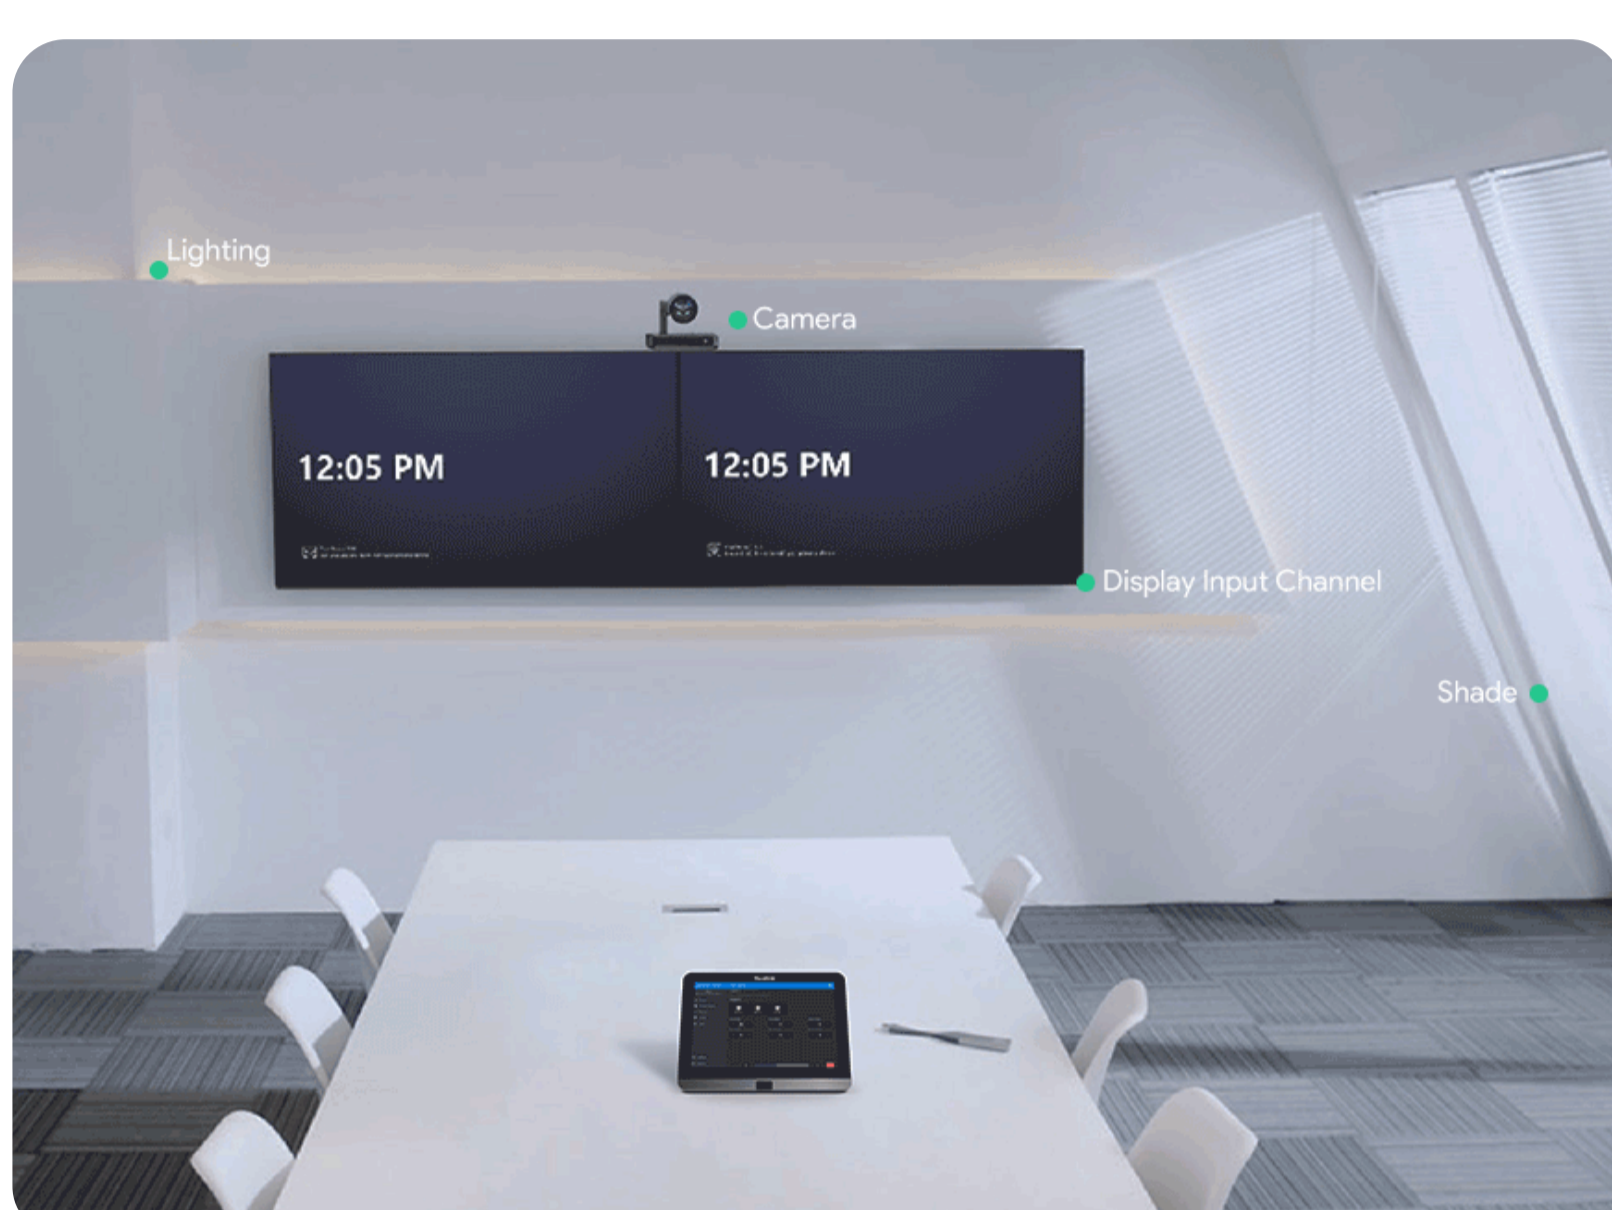

Powered by the seamlessly communication between Yealink MCore and AMX Central Controller, the solution provides customer an excellent videoconferencing and advanced room controls experience.

All Controls in One Panel

Integrated with AMX, a simple tap on the Yealink Touch Panel can control the call volume/mute for the room as well as the display, shades, lighting, and more.

Customized and Flexible

Yealink and AMX solutions offer a complete portfolio of meeting rooms covering from small rooms to ultra-large rooms. The integrated solution enables the rooms with capabilities to switch, distribute, extend, stream, enhance audio, and control AV signals according to customer's need.

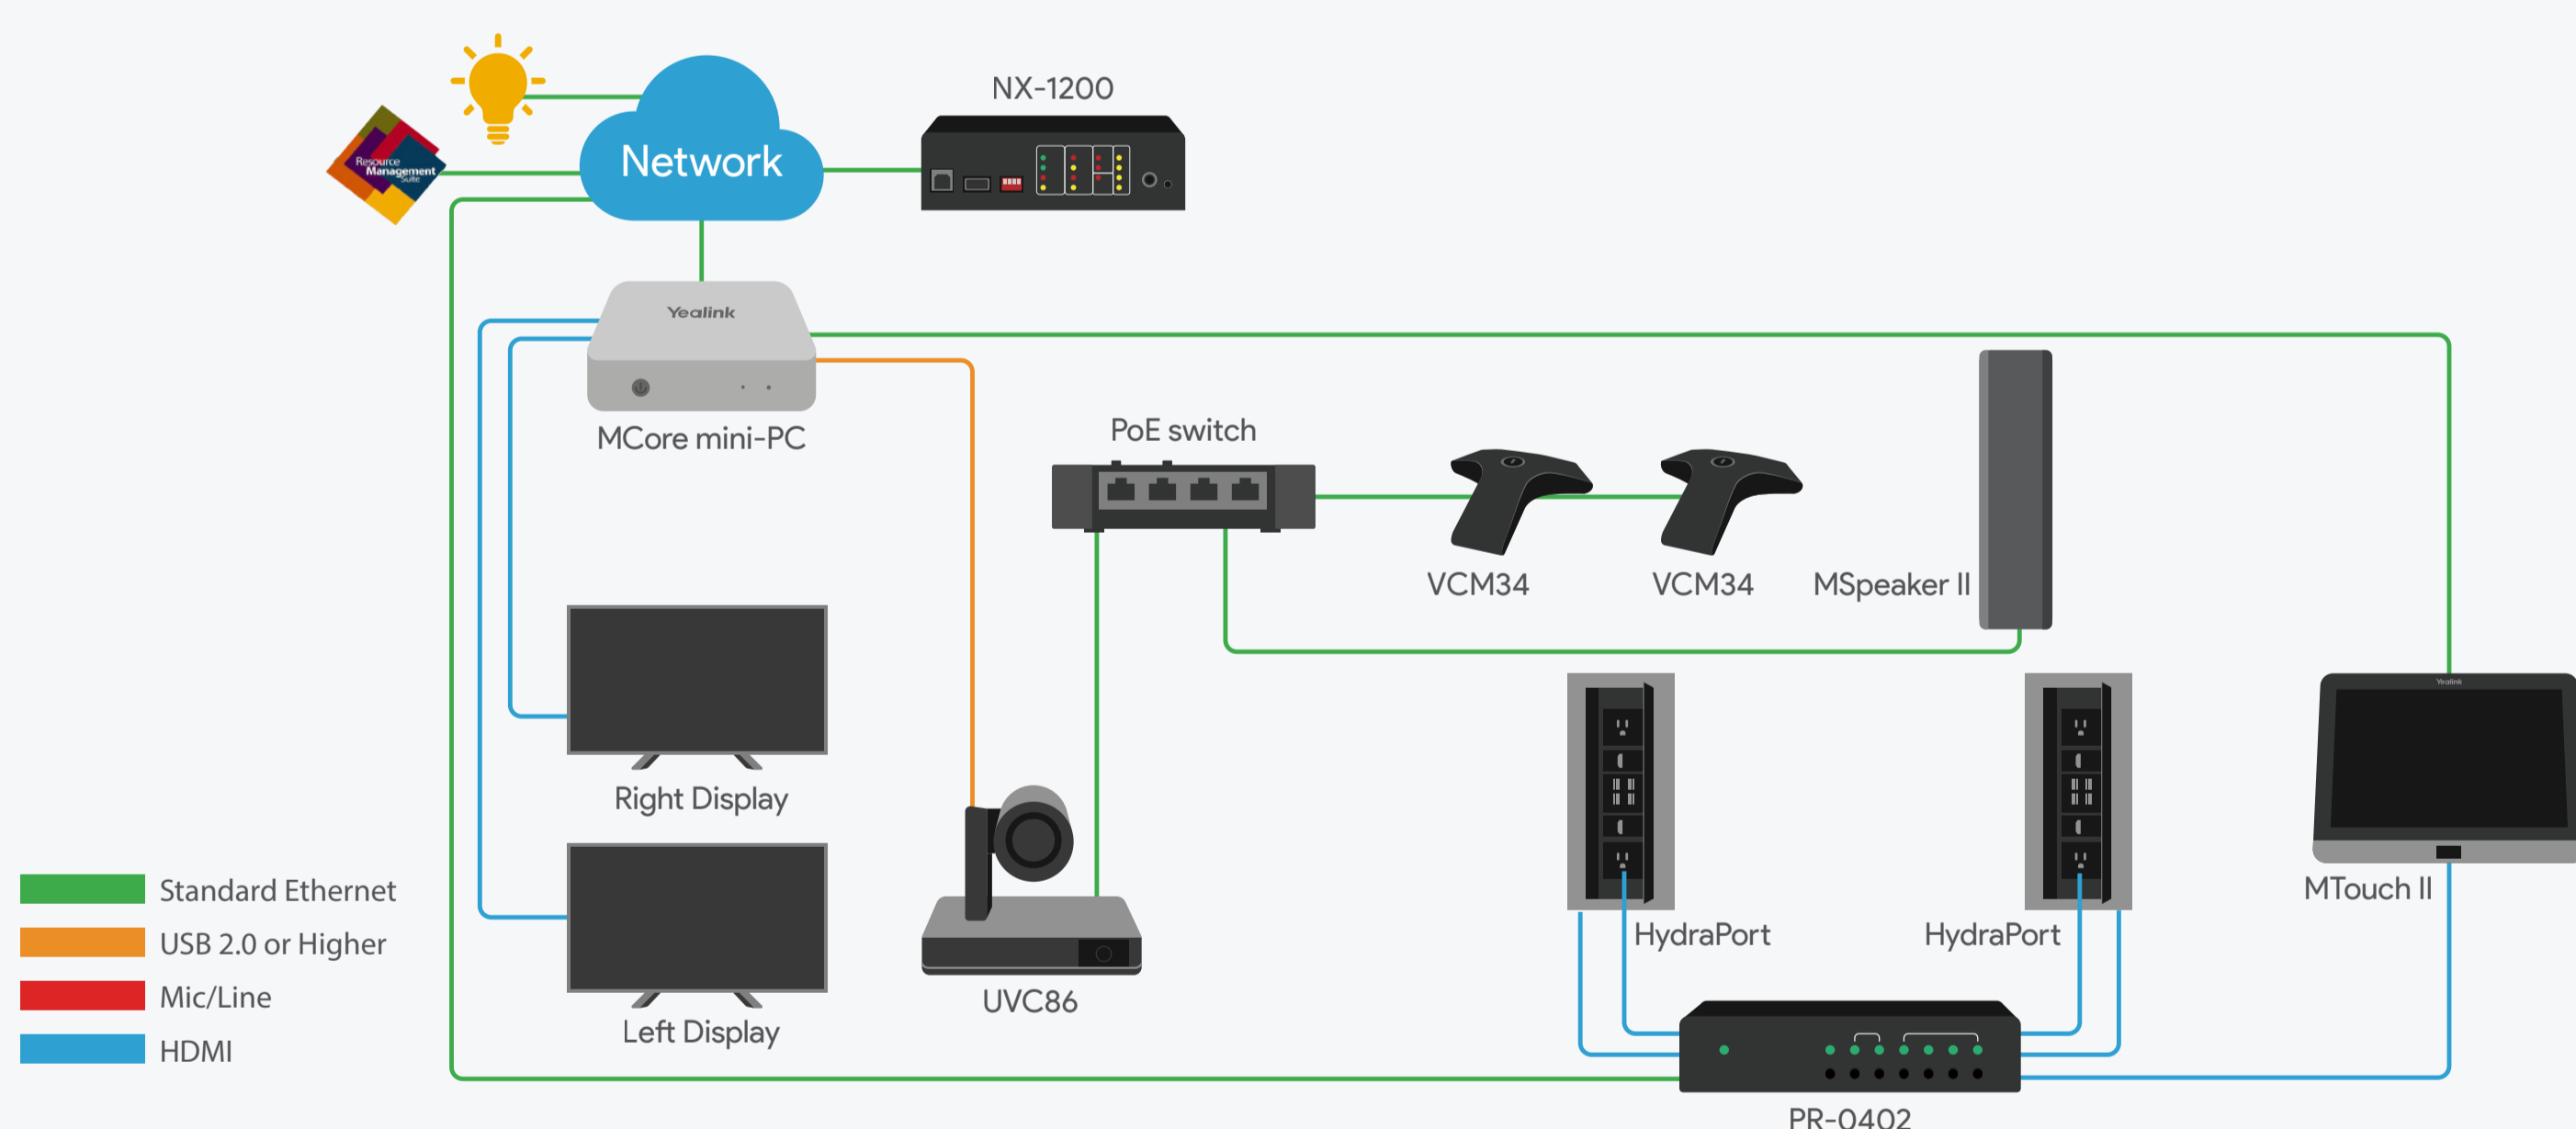

Tailored to Your Needs in Any Room

The following illustrations show examples of room configurations with Yealink video devices and AMX audio components in different size rooms and scenarios.
